

PLAIN ENGLISH LIBRARY

A FIELD GUIDE FOR REAL ESTATE AGENTS

The AI-Assisted Agent

Five copy-and-paste workflows that turn your notes into listings, follow-ups, client updates and a week of content, in plain English.

Works with ChatGPT, Claude, Gemini or any AI chat tool. No coding, no new software.

What this guide does

Most agents already know AI can write. The problem is getting it to write like you, get the facts right and stay out of trouble. This guide gives you a system for that, not a pile of random prompts.

00	Three ground rules before you start	3
01	Build your Agent Profile (do this once)	4
02	Workflow 1: The Listing Launch Kit	5
03	Workflow 2: Speed-to-Lead and the 30-Day Nurture	7
04	Workflow 3: Consultation Prep in 15 Minutes	9
05	Workflow 4: The One-Hour Weekly Content Engine	11
06	Workflow 5: Contract-to-Close Client Updates	13
07	The Prompt Library (25 prompts)	14
08	Your 30-Day Rollout Plan	15
09	Fair Housing and Privacy Checklists	16

How to use it. Read the ground rules and build your Agent Profile first. Then pick the one workflow that hurts most right now, run it on real work this week, and add the next one only when the first feels routine.

Three rules that keep you safe

AI is a fast junior assistant. You are still the licensee. Everything it drafts is your responsibility once you send it.

Rule 1: You verify every fact

AI tools can confidently invent square footage, school names, HOA fees, tax figures and even features the home does not have. Treat every number and every claim as unverified until you have checked it against the listing agreement, public records, the MLS or the seller disclosure.

Rule 2: Never paste private client data

Do not put Social Security numbers, bank details, loan documents, full names with contact details, or anything from a disclosure you would not post publicly into a general AI chat. Use placeholders like **[Buyer]**, **[Address]** and **[Lender]**, then fill them in yourself before sending. Check your brokerage's technology policy; many now have one.

Rule 3: Describe the property, never the people

Fair Housing rules apply to AI-written ads exactly as they apply to yours. AI models often reach for phrases like "perfect for young families" or "safe neighborhood." Those describe who should live there, not what the home is. Every workflow in this guide ends with a Fair Housing scan, and there is a full checklist on page 16.

Important. This guide is educational and does not replace legal, compliance or brokerage advice. Your broker, your MLS rules and your state's license law always win.

Build your Agent Profile

The reason AI writing sounds generic is that it knows nothing about you. Your Agent Profile fixes that. Write it once, save it in a note, and paste it at the top of every new conversation.

TIME

20 minutes, once

YOU NEED

3 emails or posts you wrote yourself

PROMPT 1 • CREATE MY AGENT PROFILE

I am a real estate agent. Interview me, one question at a time, to build an "Agent Profile" I can paste into future AI conversations. Ask about:

1. My market (city, neighborhoods I work, typical price range)
2. Who I mainly serve (buyers, sellers, investors, relocation, first-time buyers)
3. My brokerage name and any required disclaimer text
4. How I want to sound (for example: warm, direct, no hype, short sentences)
5. Words and phrases I never want to use
6. My sign-off and contact line

After the interview, ask me to paste 3 samples of my own writing. Study them and describe my style in 5 bullet points.

Finally, output the finished Agent Profile as one block of text under 250 words, starting with "AGENT PROFILE:".

What a good profile looks like

EXAMPLE

AGENT PROFILE: I am Dana Reyes, a licensed agent with Northline Realty in Columbus, Ohio. I mostly help first-time buyers and move-up sellers between \$250K and \$550K in Clintonville, Westerville and Grandview. My tone is warm, plain and confident. Short sentences. No exclamation points, no "dream home," no "won't last long." I explain the why behind every step. I never describe who a home is "perfect for." Sign-off: "Talk soon, Dana" plus my phone number. Include "Northline Realty, Equal Housing Opportunity" on all marketing.

Tip. Most AI tools let you save standing instructions ("custom instructions," "projects" or "gems"). Paste your profile there and you never need to paste it again.

The Listing Launch Kit

Turn one walkthrough into every piece of listing copy you need: MLS remarks, a full description, social captions, an email to your sphere and open house text. All from the same verified facts.

REPLACES	TIME WITH AI	YOU NEED
An evening of writing	25 to 40 minutes	Walkthrough notes + fact sheet

The steps

- 1 **Record a voice memo during the walkthrough.** Talk through each room: materials, light, updates, what the seller loves, what buyers will ask about. Transcribe it with your phone's built-in dictation or any transcription app.
- 2 **Build a fact sheet.** Beds, baths, square footage, lot size, year built, updates with years, HOA, utilities, parking. Pull these from records and the seller, not memory.
- 3 **Run the Fact Lock prompt** so the AI can only use your facts.
- 4 **Run the Launch Kit prompt** to generate every asset in one pass.
- 5 **Run the Fair Housing scan**, then read everything out loud once before publishing.

PROMPT 2 • FACT LOCK

[Paste Agent Profile]

Below are my verified property facts and my walkthrough notes. For this entire conversation, you may only state facts that appear in this material. If something would be useful but is missing, write [CONFIRM: what is needed] instead of guessing. Do not invent measurements, brands, school names, distances or features.

Reply only with "Facts locked" and a numbered list of any obvious gaps I should fill before we write.

VERIFIED FACTS:

[paste fact sheet]

WALKTHROUGH NOTES:

[paste transcript]

PROMPT 3 • LISTING LAUNCH KIT

Using only the locked facts, write the following in my voice:

1. MLS public remarks: [your MLS character limit, e.g. 1,000] characters maximum, including spaces. Lead with the single strongest feature.
2. Full listing description (250 to 350 words) for my website and Zillow-style portals, with short paragraphs and a room-by-room flow.
3. Five social captions: one each for Instagram, Facebook, LinkedIn, a "Just Listed" story and an "Open House" reminder. Under 60 words each. No hashtag walls; up to 3 local hashtags.
4. An email to my sphere announcing the listing, under 150 words, with a soft ask to share it.
5. Open house sign-in page intro and a 3-line flyer headline block.

Rules: describe the property, its features and its location. Never describe the type of person who should live there. Show the character count after item 1. Mark anything unverified with [CONFIRM].

PROMPT 4 • FAIR HOUSING SCAN

Act as a cautious real estate compliance reviewer. Review every piece of copy above for words or phrases that could indicate a preference or limitation based on race, color, religion, sex, disability, familial status, national origin, or any additional protected classes in my state. Also flag "steering" language about neighborhoods, safety or schools, and any claim I cannot prove.

Output a table: Phrase | Why it could be a problem | Safer rewrite. Then give me the fully revised copy.

Why this works. Separating "lock the facts" from "write the copy" is the single biggest improvement you can make. It forces the model to flag gaps instead of filling them with plausible fiction.

Before and after

TYPICAL AI DRAFT

"Welcome to your dream home! Perfect for growing families, this stunning gem sits in a safe neighborhood close to top-rated schools."

AFTER THE LAUNCH KIT + SCAN

"Sunlight fills the updated kitchen, with quartz counters and a walk-in pantry added in 2023. Three bedrooms upstairs, a fenced yard, and a 0.4-mile walk to Glenmont Park."

The rewrite describes features and verifiable distances instead of people, safety or school quality.

Speed-to-Lead and the 30-Day Nurture

Leads cool off fast. Most agents lose them not because they are bad at sales, but because they do not have the right words ready at 9:40 PM on a Tuesday. Build the library once and reply in under five minutes.

BUILD TIME	DAILY USE	RESULT
60 minutes, once	2 minutes per lead	A reply bank + 30-day sequence

Part A: The first-reply bank

Create ready-to-send first replies for your six most common lead sources. Keep them short, human and ending in one easy question.

PROMPT 5 • FIRST-REPLY BANK

[Paste Agent Profile]

Write first-reply text messages (under 320 characters) and first-reply emails (under 120 words) for each of these lead sources:

1. Portal inquiry about a specific listing
2. Open house sign-in
3. "What's my home worth?" form
4. Referral from a past client
5. Social media message or comment
6. Expired or withdrawn listing owner

Each reply must: use the person's first name as [Name], reference exactly what they asked about, offer one specific next step, and end with a single easy question. No pressure language, no fake urgency, no emojis. Label each clearly so I can copy it into my phone's text replacement or CRM templates.

Part B: The 30-day nurture sequence

Most leads are not ready this month. A calm, useful sequence keeps you top of mind without sounding like a robot.

PROMPT 6 • 30-DAY NURTURE

Create a 30-day follow-up sequence for a [buyer / seller] lead who is "just looking" and [timeline, e.g. 3 to 6 months out]. Mix text, email and one phone call.

Schedule: Day 1, 3, 7, 10, 14, 21, 30.

For each touch give: channel, goal, the exact message, and what to do if they reply. At least four touches must give something useful (a checklist, a market note, a question they should be asking) rather than "checking in." Keep every message under 100 words. End with a Day 30 "permission" message that makes it easy for them to say "not now."

Part C: The live-reply helper

When a real reply comes in and you are not sure how to respond, paste the thread (with names removed) and run this.

PROMPT 7 • WHAT DO I SAY NOW?

Here is a text conversation with a lead. Names and contact details are removed.

[paste thread]

Give me three possible replies: (A) warm and brief, (B) helpful with one useful piece of information, (C) a direct ask for a call or appointment. Under 60 words each, in my voice. Tell me which you would send and why in one sentence.

Put it where your thumbs are. Save your best first replies as text replacement shortcuts on your phone (on iPhone: Settings, General, Keyboard, Text Replacement). Typing ";portal" can expand into a full, personal reply.

Consultation Prep in 15 Minutes

Walk into every buyer or listing consultation with an agenda, the questions that uncover real motivation, and calm answers to the objections you will hear.

TIME

YOU NEED

15 minutes per meeting

What you know about the client

PROMPT 8 • MEETING BRIEF

[Paste Agent Profile]

I have a [buyer consultation / listing appointment] with a client. What I know so far (no private data): [e.g. relocating for work, current home is a 3-bed they have owned 9 years, want to move within 4 months].

Create a one-page meeting brief:

1. A 45-minute agenda with timings
2. Ten discovery questions, ordered from easy to deep, that uncover motivation, timeline, finances readiness and decision-makers
3. The five objections I am most likely to hear, each with a calm two-sentence response
4. Three things I must explain clearly (for example, how my compensation works, what happens after we sign, what I need from them this week)
5. A follow-up email I can send within an hour of the meeting

PROMPT 9 • EXPLAIN IT SIMPLY

Explain [topic, e.g. how earnest money works, what an appraisal gap is, why the first offer is often the best] to a first-time client in plain English. 120 words maximum. Use one everyday comparison. Then give me a 2-sentence version I can say out loud. Do not give legal or tax advice; add "check with [attorney / CPA / lender]" where appropriate.

PROMPT 10 • PRICING CONVERSATION FROM MY COMPS

Below are comparable sales I pulled from the MLS (address removed; include beds, baths, square feet, condition notes, sold price, days on market).

[paste comps]

Do not look anything up and do not invent comps. Using only this data: summarize the price-per-square-foot range, point out which two comps are most similar and why, and draft talking points for a pricing conversation with the seller. Include one sentence that explains, kindly, what happens to homes priced above the market.

Stay on the right side of the line. Do not ask AI which neighborhoods are "safe" or "good for" a certain type of buyer, and do not repeat that kind of output to clients. Point buyers to objective sources (crime maps, school district sites) and let them decide.

The One-Hour Weekly Content Engine

Consistency beats brilliance. One focused hour each week produces a market note, five social posts, a newsletter and a short video script, all built from what actually happened in your week.

TIME	OUTPUT
60 minutes a week	7 to 10 ready pieces

The weekly rhythm

MINUTES	WHAT YOU DO
0 to 10	Brain dump: 3 things that happened this week (a showing, a question a client asked, a stat from your MLS), plus one local event.
10 to 30	Run the Content Engine prompt.
30 to 50	Edit for your voice, check every fact, run the Fair Housing scan.
50 to 60	Schedule everything in Meta Business Suite, LinkedIn or your scheduler of choice.

PROMPT 11 • CONTENT ENGINE

[Paste Agent Profile]

Here is my week (no private client details):

[brain dump]

Here are market numbers I pulled myself from the MLS for [area] this month: [median price, days on market, new listings, months of inventory, or whatever you have].

Create:

1. A 150-word "This Week in [Area]" market note that explains what the numbers mean for buyers and for sellers
2. Five social posts: one lesson from a client question, one market stat, one behind-the-scenes, one local spotlight (a business or event, not a neighborhood "vibe"), one soft call to action
3. A 250-word email newsletter with a subject line and preview text
4. A 45-second faceless video script: on-screen text lines plus a voiceover, 6 scenes maximum

Use only the numbers I gave you. Do not predict prices. Keep claims factual.

PROMPT 12 • RECYCLE A WINNER

This post did well last month: [paste]. Write three new versions for this month that keep the same hook structure but use a different example, a different opening line and a different call to action.

Faceless video, simplified. Paste the 45-second script into a text-to-video tool, choose stock footage or your own listing photos, and add captions. You never have to appear on camera.

Contract-to-Close Client Updates

Clients rarely complain about bad news. They complain about silence. This workflow gives you a timeline, a weekly update email and calm scripts for the moments that make clients nervous.

SETUP

20 minutes per deal

WEEKLY

5 minutes per client

PROMPT 13 • BUILD THE TIMELINE

I have a [buyer / seller] under contract. Key dates from the signed agreement (please verify against the contract yourself):

- Acceptance date: [date]
- Inspection period ends: [date]
- Appraisal due: [date]
- Financing contingency: [date]
- Closing: [date]

Create a client-friendly timeline table with each milestone, what happens, what the client needs to do, and what I will do. Then create a separate checklist for me with reminders 3 days before each deadline. Do not add deadlines that are not listed; mark anything standard-but-missing as [CONFIRM IN CONTRACT].

PROMPT 14 • FRIDAY UPDATE EMAIL

Write this week's update email for my client. Status notes: [e.g. inspection done, repair request sent Tuesday, waiting on seller response; appraisal ordered].

Format: a one-line summary, "What happened this week" (3 bullets), "What's next" (3 bullets with dates), "What I need from you" (or "Nothing this week"), and a warm sign-off. Under 180 words. Calm and clear.

PROMPT 15 • HARD-NEWS SCRIPT

I need to tell my client: [e.g. the appraisal came in \$12,000 below contract price]. Draft (1) a 4-sentence phone opener that states the news, what it means and their options without panic, and (2) a follow-up email that lists the options neutrally. Do not recommend a specific legal or financial decision; suggest who they should consult where relevant.

The Prompt Library

Ten more prompts for everyday situations. Start each one with your Agent Profile and replace anything in [brackets]. Save the ones you use in a single note called "My Prompt Library" and improve them as you go.

SITUATION	PROMPT
16 • Price reduction	Write a respectful email to my seller recommending a price adjustment. Market facts: [days on market, showings, feedback themes, new comps]. Acknowledge how they feel, present the data, give two options, ask for a decision by [date].
17 • Showing feedback	Turn these rough notes from buyer agents into a clear, kind feedback summary for my seller, grouped by theme, with one suggested action per theme: [notes].
18 • Past-client check-in	Write 12 monthly check-in texts for past clients, one per month, each tied to something useful (seasonal maintenance, property tax timing, home anniversary). Under 200 characters. No sales pitch.
19 • Home anniversary	Write a short, warm "home anniversary" card message and a text version for a client who bought [X] years ago.
20 • Review request	Write a text and an email asking a happy client for a review on [Google / Zillow], including the link placeholder [LINK], with no pressure and a thank-you either way.
21 • FSBO outreach	Write a helpful, non-pushy first letter to a for-sale-by-owner seller that offers a free checklist of the paperwork and disclosures they will need, and invites a question.
22 • Vendor intro	Write an email introducing my client to [inspector / lender / mover], explaining why I am connecting them and what each should expect next. Include a note that the client is free to choose any provider.
23 • Bio rewrite	Rewrite my agent bio in three lengths (50, 120 and 250 words) using my profile. Lead with who I help and how, not years of experience.
24 • Open house follow-up	Write a same-day follow-up text and next-day email for open house visitors, referencing one feature of [property] and offering to send similar homes.
25 • Simplify a document	Summarize this [HOA rule set / inspection summary] in plain English for my client, in 10 bullets, and list 5 questions they should ask. Text has personal details removed: [paste].

Your 30-Day Rollout Plan

One workflow at a time. By day 30, the system runs on its own.

WEEK	FOCUS	DONE WHEN
Week 1	Agent Profile + first-reply bank (Prompts 1, 5)	Your profile is saved in your AI tool and your 6 first replies are saved as phone shortcuts or CRM templates.
Week 2	Listing Launch Kit (Prompts 2 to 4)	You have run it on one real or past listing and saved the version you liked best as your template.
Week 3	Content Engine (Prompts 11, 12)	You have scheduled one full week of content in a single hour.
Week 4	Nurture + client updates (Prompts 6, 13, 14)	Every active lead is in a sequence, and every client under contract received a Friday update.

Track three numbers

- ☐ Hours spent writing this week (before vs. after)
- ☐ Average minutes to first reply on new leads
- ☐ Number of posts or emails published this week

If one number is not improving by week four, go back to that workflow and tighten your Agent Profile. Better input beats a better prompt almost every time.

Fair Housing and Privacy

Print this page. Check it before anything AI-written goes public.

Before you publish marketing

- ☐ The copy describes the property and its features, not the ideal buyer.
- ☐ No words about who a home is "perfect for" (families, couples, singles, retirees, professionals, students).
- ☐ No references to religion, ethnicity, national origin, age, disability or familial status, direct or implied.
- ☐ No claims about neighborhood "safety," "exclusivity" or school quality. Use objective, verifiable facts instead (e.g. "0.3 miles to Pine Street Library").
- ☐ Accessibility features are described factually ("zero-step entry," "36-inch doorways") rather than as who they suit.
- ☐ Every measurement, date and feature has been checked against a source document.
- ☐ Brokerage name, license details and Equal Housing Opportunity language meet your broker's and state's requirements.

Before you paste anything into AI

- ☐ Names, phone numbers, emails and addresses replaced with placeholders.
- ☐ No financial documents, account numbers, IDs or loan details.
- ☐ No confidential negotiating positions (for example, a seller's lowest acceptable price).
- ☐ You are following your brokerage's technology and data policy.

INSTEAD OF	TRY
"Perfect for a growing family"	"Four bedrooms, with a fenced backyard"
"Safe neighborhood"	"Tree-lined street with sidewalks"
"Walking distance to St. Mary's Church"	"0.5 miles to Main Street shops and transit"
"Great starter home for young couples"	"Two bedrooms with updated kitchen, 2021"
"Exclusive community"	"Gated entry with 24-hour staffed gatehouse"

These are common examples, not a complete list. Rules vary by state and MLS. When in doubt, ask your managing broker.

Thank you for reading

Plain English Library makes practical guides for people who would rather get the job done than decode jargon. Every guide is written to be used this week, not someday.

If this guide saved you time, the best thank-you is a short note about what worked, or telling one agent friend about it. More guides and free resources: **plainenglishlibrary.com**
